1. Why do we insist on producing a delete confirmation screen?

1 / 1 point

- ☐ Because Django would not be able to delete the data
- ☐ To make sure that there are no JavaScript errors
- ☒ Because a GET request should never modify data
- ☐ Because a POST request cannot modify data

✔ **Correct**

2. Which of the following methods is called first in the Django generic list view?

1 / 1 point

- ☐ startup
- ☐ get\_queryset()
- ☐ render\_to\_response()
- ☐ get()
- ☒ setup()

✔ **Correct**

3. Which method do we override in the Django generic list view to keep users from making changes to rows they don't own?

1 / 1 point

- ☐ get()
- ☒ get\_queryset()
- ☐ render\_to\_response()
- ☐ setup()
- ☐ startup

✔ **Correct**

4. What does OwnerUpdateView do if a user tries to delete a record that does not belong to them?

1 / 1 point

- ☐ It stops and fails with an error log message
- ☒ It returns a 404 (not found error)
- ☐ It puts out an error message in the JavaScript console
- ☐ It redirects the user to www.djangoproject.org

✔ **Correct**

5. What template variable indicates the current logged-in user?

1 / 1 point

- ☐ article.owner
- ☐ myarts.owner
- ☒ user
- ☐ request.user
- ☐ tsugi.user

✔ **Correct**

6. What is the name of the model that Django uses to store User objects?

1 / 1 point

- ☐ settings.USERS
- ☐ Users
- ☐ DjangoUsers
- ☐ django.users
- ☒ settings.AUTH\_USER\_MODEL

✔ **Correct**

7. What is the database relationship between the Article model and User model?

1 / 1 point

- ☒ One-to-Many
- ☐ One-to-One
- ☐ Many-to-Many
- ☐ Zero-to-Zero

✔ **Correct**

8. In views.py in the myarts sample code, what is the purpose of the "fields" class-wide value?

1 / 1 point

- ☐ To make the listed fields un-editable
- ☐ To list the fields that will be autosaved
- ☐ To double-check that model fields are not missing
- ☒ To limit the model fields displayed in the form

✔ **Correct**

9. For a data model named Frog, what is the generic Edit View convention for the template used when editing a Frog object?

1 / 1 point

- ☐ frog\_modify.html
- ☐ frog\_edit.html
- ☒ frog\_form.html
- ☐ frog\_update.html

✔ **Correct**

10. In the OwnerCreateView class, what method is overridden to set the "owner" field to the current logged-in user?

1 / 1 point

- ☐ save(commit=False)
- ☒ form\_valid()
- ☐ add\_owner()
- ☐ LoginRequiredMixin

✔ **Correct**

11. In OwnerUpdateView, how do we make sure that the current logged-in user cannot retrieve any rows that don't belong to them?

1 / 1 point

- ☐ We retrieve all the objects and throw away the non-owned objects
- ☒ We add a model filter
- ☐ We call the method of the same name in the super class
- ☐ We intercept the SQL and add a WHERE clause

✔ **Correct**

12. In OwnerUpdateView, which is the "super" or "parent" class?

1 / 1 point

- ☐ UpdateView::Super
- ☐ SuperUpdateView
- ☒ UpdateView
- ☐ OwnerUpdateView
- ☐ get\_queryset()

✔ **Correct**

13. When a generic edit view is receiving POST data, which of the following steps is done first?

0 / 1 point

- ☐ clean()
- ☐ form\_valid()
- ☐ first\_post()
- ☐ pre\_post()
- ☒ get\_query\_set()

✘ **Incorrect**
